SUMMARY

My name is Maria Shahpazova and I have a passion for self-development, accuracy and perfection. My initial background is related to linguistic studies which reflected my interest in language systems in this period. As a result, I won 3 prizes in literature contests and translation. Recently, I have been predominantly involved in digital & printed media and gained an end-to-end experience in project management and coordination.

During the past year and a half, I have been developing my skills in C#, Java, Ruby and Ruby on Rails, OOP, SOLID principles, regular expressions, HTML, CSS etc. in Telerik Academy, Software University Foundation and Hack Bulgaria.

I believe I would be a valuable member of your team because I'm creative, a fast learner, easy going and have lots of enthusiasm. Moreover, I strive for constant development of my technical skills because of my decisiveness to achieve professional growth in this area.
